Proven AC technology!
Hyundai 9 Series battery forklift

Introducing the new, upgraded Hyundai 9 Series electric pneumatic tire forklift.

The new B-9U Series brings customer added value to the next level by dramatically reducing energy costs and enhancing powertrain durability.

Work efficiency & productivity

- 32% increase in energy efficiency with EHPS (Electro Hydraulic Power Steering) system application
- Powerful and precise driving performance of dual drive motors
- Vehicle performance optimized for various working conditions
- Directional & horn switch on lever (OPT)
- 2 Door bolt on type cabin (OPT)

Durability & reliability

- Improved drive unit input shaft
- Dual micom with improved data processing reliability : ZAPI Controller
- Semi-permanent Oil Cooled Disc Brake
- IP43 Motor & IP65 Controller

Safety

- EHPS (Electro Hydraulic Power Steering)
- Automatic deceleration in travel speed when turning (Curve Control)
- Prevention of rear roll back when restarting after ramp stop (Ramp Hold)
- Maximum speed limit setting
- Operator Presence Sensing System (OPSS)

Easy management

- Self-diagnosis of electric system failure
- Durable Continental solid tire
- Brake oil level sensing system

Power&Performance

High Efficiency & Optimal Performance

An efficient, smooth running and compact design provides enhanced performance and outstanding productivity.

Some of the photos may include optional equipment.

Strong driving power : Dual drive motor system UPGRADE

The dual drive motor system consists of two separately controlled drive motors. Unlike the single drive motor system, it prevents the wheels from spinning even when the traction of the left and right wheels is different. In addition, it enables high performance in less than optimal environments such as uneven or wet pavement. As the pivot point is the axle of the wheels, the dual system enables relatively small turning radius compared to the single system, thus improving efficiency in small worksites.

Some of the photos may include optional equipment.

Improvement in energy consumption

EHPS (Electro Hydraulic Power Steering) system only functions when the driver operates the steering wheel and significantly reduces the energy consumption because unlike the current hydraulic power steering (HPS) system, the pump doesn't continuously run in standby. Moreover, the hydraulic pump noise generated during steering standby mode of the HPS system has been completely eliminated.

Previous model (25B-9: 715Ah) : 185 minutes (100%)

Upgraded model (25B-9U : 660Ah) : 259 minutes (140%)

* The figures above are based on Hyundai's test results for a single charge cycle and may differ from actual working conditions.

UPGRADE

EHPS (Electro Hydraulic Power Steering)

With the energy efficiency of electric power steering and the stability of the hydraulic power steering, the EHPS system is composed of a torque sensor, controller, motor, hydraulic pump, and steering cylinder, and efficiently operates with little energy required.

Robust and economical AC motor

The enclosed drive and pump motors with AC technology combine power, extended maintenance intervals and excellent durability. The brushless AC motors offer improved efficiency and reduced maintenance cost. It is certified IP43.

UPGRADE

Dual MiCOM ZAPI controller

The new ZAPI AC controller with dual micom and made by ZAPI monitors the dual signals and detects faults. So it is possible to control the forklift quickly and securely.

Wet disc brake

The wet disc brake system is virtually maintenance free and the enclosed design protects from dust and water.

Optimized operation mode setting

Through the cluster and ZAPI controller function, optimal performance mode - H (High), N (Normal), E (Economic) - can be selected based on working conditions, worksite size and operator's proficiency.

Turtle mode

Selecting turtle mode allows the operator to reduce travel to a pre-set speed, which is ideal when working in narrow and or congested work areas.

Easy & Comfort

Optimized Ergonomics & Fast and Easy Maintenance

An ideal arrangement of components ensures easy access and convenience for maintenance.

COMFORTABLE WORKSPACE

ADVANCED MONITORING SYSTEM

Some of the photos may include optional equipment.

Ergonomically designed workspace

Ergonomic design focusing on operator convenience and maneuverability further enhances work efficiency. Easy to operate levers and pedals, adjustable handle, suspension seat and a large multi-functional cluster dashboard allow comfortable and efficient driving. A 12V power socket is an optional feature to improve operator convenience.

Some of the photos may include optional equipment.

Grammer seat

Adjustable ergonomic seat provides unmatched comfort. The adjustable armrest further reduces operator fatigue.

- Accommodates operator weights from 50 to 160 kg.(110 to 353 lbs).
- ELR (Emergency Locking Retractable) type seat belt
- Heater and headrest (OPT)

Steering wheel position

A steer sensor is installed on the king pin of the rear axle, communicating on the LCD display to show the direction of the vehicle in relation to the steer wheel angle.

Directional & horn switch on lever (OPT)

An optional electronic directional control and secondary horn are mounted to the hydraulic lift lever for quick and precise directional control. Also, the position of the horn button provide quick access if needed.

Adjustable steering wheel

The angle of the steering column can easily be adjusted to improve operator comfort.

4.3inch LCD color monitor

The LCD color monitor with 4.3 inch graphic smart display allows the operator to identify speed, travel direction, and operating hours and control the machine efficiently. The load indicator displays the load weight in the monitor. The operator can select various performance modes to meet all working conditions. Multilanguage (maximum 12) is available.

Main functions

- | | |
|--|------------------------------|
| ① Speed (Digital) | ⑦ Turtle / Scroll down |
| ② Steering wheel position and travel direction | ⑧ ESC / Back |
| ③ Battery discharge indicator | ⑨ Enter |
| ④ Scroll up | ⑩ Low brake oil warning lamp |
| ⑤ Menu / Scroll Left | ⑪ Error warning lamp |
| ⑥ Performance / Scroll right | ⑫ High temp warning lamp |

Easy maintenance of battery

The battery cover opens fully with the assistance of a gas strut that locks when fully opened to give easy access to battery and prevent the hood from dropping.

Brake oil reservoir with level sensor

The enhanced brake oil reservoir, located in the upper left dash is equipped with an electronic level sensor that shows the level in the LCD color monitor.

Secure & Safety

Advanced Safety

The safely designed driver's space makes your operator more comfortable.

EXCELLENT VISIBILITY

ADVANCED SAFETY

Some of the photos may include optional equipment.

You can see the video by scanning the QR code.

Excellent visibility for safe operation

Lift cylinders and lifting chains are positioned behind the mast rails for optimum visibility. A rear camera(OPT) and panoramic mirror expands the driver's view when backing up.

Some of the photos may include optional equipment.

Strong overhead guard

Exceeding ISO 6055 regulations, the overhead guard offers great protection combined with excellent all around visibility.

Curve control

Curve Control limits travel speed based on turning radius, reducing speed for a smooth, precise turning operation for the driver.

Maximum speed control

The operator can set and limit the maximum speed from 11 mph to 0.5 mph unit, given the curve & congestion of an aisle and the shape of the load.

Password starting system

By granting the operation authority only to the designated driver, it is possible to manage the vehicle and prevent theft.

Safety features

The adoption of a high-sensitivity sensor and advanced safety system can prevent accidents.

Anti roll back system

Anti Roll-back system offers protection against the machine rolling back on a ramp in combination with exceptional ramp start capabilities.

Fork safety features

As the forks are being lowered, a down-control valve maintains a controlled descent speed. The down-safety valve prevents forks from dropping down in case of sudden damage of hydraulic line.

Operator Presence Sensing System(OPSS)

When operator is not in seat the hydraulic lift and tilt controls and travel are locked out.

Strengthened work safety

Rear LED lights offer excellent visibility even during night operations. Safety has been increased by installing additional reflectors on the counterweight.

25/30/32/35B-9U

Load Capacity

25B-9U

30B-9U

32B-9U

35B-9U

Optional Items

- Fork(mm)
25B-9U : 900, 1000, 1050(STD), 1200, 1350, 1500, 1650, 1800, 2100
30/32/35B-9U : 900, 1050(STD), 1150, 1200, 1350, 1500, 1650, 1800, 1970, 2120, 2300, 2400
- Integral side shift
- Tire :
Solid(STD)/pneumatic/non-marking

- Wide [25/30/32B-9U:Front(23X10-12)]
- Finger Tip Control
- Cold Strage : Applicable to working conditions of up to -30°C
- M.C.V : 2-Spool, 3-Spool(STD), 4-Spool
- Auto fork leveling
- Detachable / attachable battery side items

- Cabin (one-door)
 - ① FRONT + ROOF + REAR
 - ② FRONT + ROOF + REAR + DOOR
 - ③ FRONT + ROOF + REAR + DOOR + HEATER

Various Attachments

Side Shift

Hinged Fork

Hinged Bucket

Rotating Fork

Push Pull

Rotating Roll Clamp

Load Stabilizer

Carton Clamp

Pallet Invert

Drum Clamp

Bale Clamp

Load Extender
